Event Report

To create your vision for tomorrow, you need to understand what the cloud can do for you and your company today. Microsoft Azure, Fundamentals explains cloud-computing concepts, models, and services, covering topics such as public, private, and hybrid cloud as well as infrastructure as a service, platform as a service, and software as a service.

Students will learn about Unified Endpoint Management (UEM) solutions across device platforms to architect and implement the optimal management strategy. While also getting a better understanding of how core security products further deliver the integrated security value relative to the UEM strategy. This includes foundational knowledge, practical application through integrated scenario design workshop, and walk-through demos.

Total number of students: 20 (M) 15 (F) 05
