

Event Title: Seminar on “**Data Sciences**”

Department: **Bachelor of Computer Application (BCA)**

Date and Time: August 23, 2019

Venue: Seminar Hall, AB-2, JIMS Engineering Management Technical Campus,  
48/4, Knowledge Park-III, Greater Noida, U.P. 201308

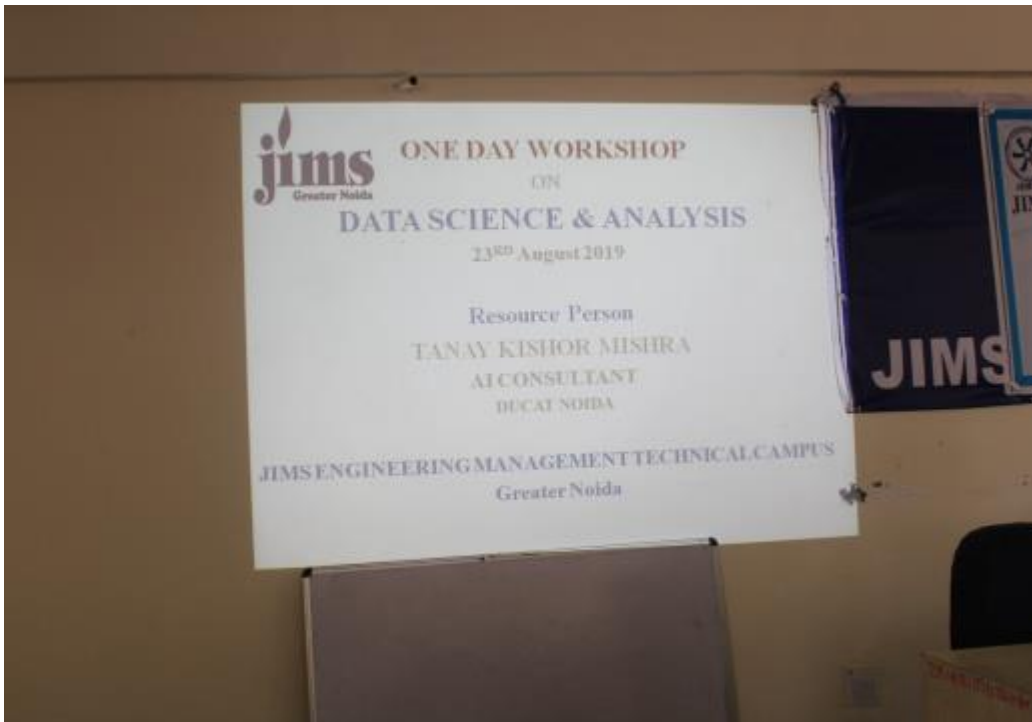

Conducted by (Resource Person): Tanay Kishore Mishra

Company: Ducat (I) Pvt. Ltd.

Data has supported research since the dawn of time, but recently there has been a paradigm shift in the way data is used. Today researchers and practitioners are mining data for patterns and trends that lead to new hypotheses. This shift is caused by the huge volumes of data available from, e.g., social media websites, web query logs, sensors, and medical devices. Big Data has been established as an umbrella term to cover such high-volume and complex data. BCA 3<sup>rd</sup> year students attended the seminar.

In this seminar, the speaker covered recent topics of Data Science in the era of Big Data. This seminar was ideal for students interested in data science, data mining, large-scale data analytics, and/or machine learning.
