

REPORT OF INDUSTRIAL VISIT SPRAY TECHNICS

The electrical engineering students of 4th, 6th and 8th semester of JEMTEC, Greater Noida visited SPRAY TECHNICS, Plot no. 49 and 50 Toycity, Ecotech- III Greater Noida- 201306 on 29th January 2020. Spray Technics is highly modernistic state-of-the-art infrastructural facility is inclusive of all the necessary machinery, equipment and instruments which facilitates the attainment of a number of the firm's goals and objectives. For reasons of managing the firm's operations in the best possible manner, parted their facility into several units, under the direct supervision of skilled and experienced managers.

The industry is the manufacturer of paint booths and garage tools for various automobile industries. All the machinery there were PLC and SCADA based as a particular program was feed into the machine and the functioning of the machines were observed.

This industrial visit was really beneficial for the students and we appreciate this decision of college. Such visits should further be conducted in order to promote awareness and knowledge among the students.
