JIMS Engineering Management Technical Campus, Gr. Noida

Department: Computer Science & Engineering

Guest Lecture on Predicting House Prices with Machine Learning

Report: The Department of CSE organized the event titled "Introduction to Data Science: Predicting House Prices with Machine Learning" was conducted to provide participants with an introductory understanding of data science concepts and practical applications using machine learning. The session emphasized the role of data in making informed decisions and demonstrated how machine learning techniques can be applied to predict house prices. The primary objective of the event was to introduce the fundamentals of data science and machine learning, explain the workflow of a typical data science project and Demonstrate the application of machine learning models in predicting house prices using real-world datasets.
